

A pixelated, black and white image of a stylized, abstract figure or shape, possibly representing a person or a large letter, rendered in a low-resolution, dithered style. The figure is composed of several distinct parts: a large, curved shape on the left, a central vertical structure with a horizontal crossbar, and a small, separate square-like shape on the right. The entire image is rendered in a dithered, pixelated style, giving it a retro, low-resolution appearance.

A pixelated, black and white representation of the mathematical expression x^2 . The image is composed of a grid of small squares, some of which are filled with black or gray to form the shape of the variable 'x' and the superscript '2'. The 'x' is formed by two intersecting diagonal lines, and the '2' is a small, blocky numeral. The overall style is reminiscent of early computer graphics or a low-resolution digital font.

A pixelated, grayscale image of a stylized anchor, likely a logo for the University of Michigan. The anchor is composed of a central vertical shaft and two curved arms at the top and bottom. The image is rendered in a low-resolution, pixelated style using shades of gray on a white background.
